Sample Date: 14-Apr-2025
 Sample Received Date: 14-Apr-2025

Analysis Completed: 16-Apr-2025
Date of Report: 16-Apr-2025

AHK Ref: A/89936
Client Ref:

Material Described As: PGM BEARING MATERIAL

Analysis Start date: 15-Apr-2025

Client Ref.			Sample A	Sample B
Platinum	(Pt)	g/t	0.36	0.70
Ruthenium	(Ru)	g/t	0.22	0.35
Palladium	(Pd)	g/t	0.13	0.20
Rhodium	(Rh)	g/t	0.08	0.16
Iridium	(Ir)	g/t	0.04	0.07
Gold	(Au)	g/t	< 0.024	< 0.024

The results relate only to the item(s) tested. The results apply to the sample as received. Sample date is provided by the customer. The estimate of the measurement uncertainty will be made available when required by the customer.

Results reported as “<” or “>” indicate that the analyte concentration falls outside the validated quantification range of the method. “<” means the analyte was detected, but its concentration is below the level at which it can be reliably quantified. “>” indicates the concentration exceeds the upper working range.

Alfred H. Knight (SA) (PTY) Limited Analytical Method Summary

SAM-008 - 5E PGMs + Au Analysis by NiS collection with ICP-OES Finish.
